

LABSHEET 12

Module

Front-end
Web
Development

Module Code

IT43004FP

Duration

3 hours

Title:

Validate Web form using JavaScript

Objective(s):

At the end of these lessons, students will be able to.

- Validate a web form using JavaScript.

Tools, Equipment and Materials:

- 1 Personal Computer with Internet access
- 2 Web Authoring Tool (e.g. Adobe Dreamweaver CC, Visual Studio Code)
- 3 Web Browser

Instructions:

Part (A) – Create a web form

- 1 Create the feedback form as shown below:
- 2 Save the file as FeedbackForm.html.

Feedback Form

Personal Information

* First Name

first name

Pls fill in the Information

* Last Name

last name

Pls fill in the Information

* Email Address

email

Pls fill in the Information

* Mobile Number

mobile number

Pls fill in the Information

* Gender

☐ Male
☐ Female

Pls fill in the Information

* Comments (required, please limit to 300 characters):

Your Comments

Pls fill in the Information

LABSHEET 12

Module

Front-end
Web
Development

Module Code

IT43004FP

Duration

3 hours

Part(B) Create a JavaScript file

1. Create a new file.
2. Type in the following:

```
function validateFeedback() {  
  
}
```

3. Save the file as validateFeedback.js. (**This file must be in the same folder as the html file.**)

4. Type in the following codes:

a) Clear all error messages

//clear error messages in the span element

```
if(document.getElementById("errfName").innerHTML != ""){  
    document.getElementById("errfName").innerHTML = "";  
}  
if(document.getElementById("errlName").innerHTML != ""){  
    document.getElementById("errlName").innerHTML = "";  
}  
if(document.getElementById("errEmail").innerHTML != ""){  
    document.getElementById("errEmail").innerHTML = "";  
}  
if(document.getElementById("errMobile").innerHTML != ""){  
    document.getElementById("errMobile").innerHTML = "";  
}  
if(document.getElementById("errGender").innerHTML != ""){  
    document.getElementById("errGender").innerHTML = "";  
}  
if(document.getElementById("errArea").innerHTML != ""){  
    document.getElementById("errArea").innerHTML = "";  
}
```

LABSHEET 12

Module

Front-end
Web
Development

Module Code

IT43004FP

Duration

3 hours

b) Store textbox values into a variable

```
// store textbox value into variable
// first name
var fname = document.feedbackForm.txtfName;
    var newfname = fname.value;
    var fname0 = newfname.charAt(0); // New addition
    var fname1 = newfname.charAt(1); // New addition
// last name
var lname = document.feedbackForm.txtlName;
// Email
// store the index value of @ and .
var emailID = document.feedbackForm.txtEmail;
atpos = emailID.value.indexOf("@");
dotpos = emailID.value.lastIndexOf(".");
// store mobile number into variable
var mobileN = document.feedbackForm.txtMobile;
var mobileExpress = /^[8-9]{1})?([0-9]{7})$/; //mobile number must starts with
                                           8/9 and total digits must be 8. Letters not allowed
// store the value of checkbox and radio buttons. True/False
var maleChk = document.getElementById("rbMale").checked;
var femaleChk = document.getElementById("rbFemale").checked;
var areaChk = document.getElementById("txtArea").value;
```

c) Check if the variable is empty and change box background colour

```
// check if first name is empty
    if(fname0 == "" && fname1 == ""){
        document.getElementById("errfName").innerHTML = "<br>Please enter your first
                                                    name, with minimum of 2 characters!";
        fname.style.backgroundColor = "pink"; // change to pink colour
        fname.focus();
        return false;
    }
// change back to light colour
// if(fname.value != "" && fname0 != ""){
    if((fname0 != "") && (fname1 != "")){
        fname.style.backgroundColor = "#e8f0fe"; // change colour
// errfName.innerHTML="";
        document.getElementById("errfName").style.display = "none";
    }
// check if last name is empty
    if (lname.value == ""){
        document.getElementById("errlName").innerHTML = "<br>Please enter your last
                                                    name, with a minimum of 2 characters!";
        lname.style.backgroundColor = "pink"; // change to pink colour
```

d) Return a true value if all inputs are filled

```
return true; // return a true value if all input fields are filled correctly
```

5. Test out your program and see if it works.
6. The output you should see is this:

Congratulations

You have successfully submitted your feedback form!
