Duration

3 hours

Title:

Create HTML List

Objective(s):

At the end of these lessons, students will be able to.

- create different HTML lists.

Tools, Equipment and Materials:

- 1 Personal Computer with Internet access
- 2 Web browser
- 3 Visual Studio Code (VSC)

Instructions:

Part A – Get Ready Visual Studio Code

- 1 Create a folder that called say [Lab04](#) > launch Visual Studio Code and open that folder in the [Explorer](#) panel.
- 2 In Visual Studio Code, click [File](#) > [New File](#) to create and save a new file called [create- html-lists.html](#) and titled [Create HTML List](#).

Part B – Create an Unordered List

1. Apply the appropriate [HTML tags and attributes](#) to create the following web content:

Making Challah Bread

Ingredients:

- Bread flour 350g
- Yeast 7g
- Salt 6.5g
- Eggs 65g
- Water 65g
- Honey 40g
- Butter 55g

2. Save and preview your webpage.

Part C - Create an Ordered List

1. Continue to create an [ordered list](#) that displays the following content:

Steps:

1. Prepare the workplace
2. Scale and collect all the ingredients and equipment
3. Mix and knead all the ingredients into a dough
4. Proof the dough for 80 minutes
5. Divide the proofed dough into 3 equal portions
6. Shape each portion into a 30cm long braided loaf
7. Proof the shaped loaves for 45 minutes at 25 degrees celsius
8. Brush with egg wash and sprinkle with sesame
9. Bake at 190 degrees celsius for 20 minutes

2. Save and preview your webpage.

Part D – Explore List Item Style

1. Change the style of the list items as shown:

Ingredients:

- Bread flour 350g
- Yeast 7g
- Salt 6.5g
- Eggs 65g
- Water 65g
- Honey 40g
- Butter 55g

Steps:

- I. Prepare the workplace
- II. Scale and collect all the ingredients and equipment
- III. Mix and knead all the ingredients into a dough
- IV. Proof the dough for 80 minutes
- V. Divide the proofed dough into 3 equal portions
- VI. Shape each portion into a 30cm long braided loaf
- VII. Proof the shaped loaves for 45 minutes at 25 degrees celsius
- VIII. Brush with egg wash and sprinkle with sesame
- IX. Bake at 190 degrees celsius for 20 minutes

2. Save and preview your webpage.

Part E – Create Nested Lists

1. Create a list of books by genres as shown:

Book Genres

1. Adventure
 - Life of Pi
 - The Three Musketeers
2. Classics
 - Beloved
 - Little Women
3. Fantasy
 - The Water Dancer
 - Ninth House
4. Romance
 - Brazen and the Beast
 - The Savior

2. Save and preview your webpage.

Part F – Create a Definition List / Description List

1. Create a list that describes the various [types of hot coffee drinks](#) as shown:

Types of Hot Coffee Drinks

Black Coffee

No frills here: Black coffee is made from plain ground coffee beans that are brewed hot. It's served without added sugar, milk, or flavorings.

Decaf

Coffee beans naturally contain caffeine, but roasters can use several different processes to remove almost all of it. Decaf coffee is brewed with these decaffeinated beans.

Espresso

Coffee beans for making espresso are more finely ground, and they're brewed with a higher grounds-to-water ratio than what's used for coffee. The result is a thicker, more concentrated liquid with a bolder flavor. A single espresso is a one-ounce shot. It's also the base for popular coffee-shop drinks like lattes and cappuccinos.

Latte

This classic drink is typically 1/3 espresso and 2/3 steamed milk, topped with a thin layer of foam, but coffee shops have come up with seemingly endless customizations. You can experiment with flavored syrups like vanilla and pumpkin spice or create a nondairy version by using oat milk. Skilled baristas often swirl the foam into latte art!

2. Save and preview your webpage.

Review

1. List all the item styles for unordered list?

Disc, Circle, Square and None

2. List all the item styles for ordered list?

type="1", type="A", type="a", type="I"

- END -
